DID YOU KNOW?

SATELLITES CAN OBSERVE EARTH FROM SPACE.

Earth Observation satellites collect valuable data about our planet every day. This information helps us **understand** changes in the environment and **our water resources.**

THESE DATA HELP US:

- Monitor rainfall and **water availability**
- Assess **vegetation** and land conditions
- Detect **droughts** and **floods**
- Support better decisions for a **sustainable** future

> "DATA FROM SPACE, **SOLUTIONS** FOR EARTH."

FROM SPACE. FOR EARTH.

EARTH OBSERVATION FOR A BETTER TOMORROW.

EARTH OBSERVATION | DATA AND INFORMATION | KNOWLEDGE FOR ACTION | STRONG COMMUNITIES
